

BRUSHED UP THE PREVIOUS KNOWLEDGE :

1. **Compiler Understanding:** Revisited how computers interpret C++ programs and refreshed the process of running basic “Hello World” program using command line interface.
2. **Creating Simple C++ Programs:** Practiced creating straightforward programs in C++ to perform tasks like converting weights or displaying time. It was like remembering how to tell the computer what to do and show the results.
3. **Introduction to Classes in C++:** Reviewed how to group instructions together in a class, like organizing things in a box. Refreshed the process of creating a "Clock" box to store and display time in different formats.
