LEARNINGS :

1. **Introduction to Classes in C++:** Reviewed how to group instructions together in a class, like organizing things in a box. Refreshed the process of creating classes like "ROOM" for calculating for surface area of room and volume of room and class "NOTECALCULATOR" for calculating Denomination of Notes.

2. **Introduction to class methods :** Learned about how to declare variable in classes under different access modifiers and also learned how to call an object function using dot(.) operator.
